**REMARKS** 

Claims 11-42 are pending in the present application.

Claims 1-10 have been previously canceled without prejudice.

Claims 11-16, 18, 27-32, and 34 stand rejected under 35 U.S.C. § 103(a) over EP 425,405

A2 to James et al. ("James") in view of U.S. Patent No. 5,459,656 to Fields et al. ("Fields") and

in further view of "The keys to the enterprise: integrated applications drive information systems

to new horizons – enterprise wide integration" to Dusty Rhodes ("Rhodes").

Claims 17, 19-26, 33, 35-37, and 39-42 stands rejected under 35 U.S.C. § 103(a) over

James in view of Fields and Rhodes and in further view of "Dun & Bradstreet Software Delivers

Sales and Promotion System to Manufacturers" to Frank O. Smith ("Smith").

Applicant respectfully submits that all of Applicant's arguments and amendments are

without prejudice or disclaimer. In addition, Applicant has merely discussed example

distinctions from the cited prior art. Other distinctions may exist, and as such, Applicant

reserves the right to discuss these additional distinctions in a future Response or on Appeal, if

appropriate. Applicant further respectfully submits that by not responding to additional

statements made by the Examiner, Applicant does not acquiesce to the Examiner's additional

statements. The example distinctions discussed by Applicant are considered sufficient to

overcome the Examiner's rejections. In addition, Applicant reserves the right to pursue broader

claims in this Application or through a continuation patent application. No new matter has been

added.

REJECTION UNDER 35 U.S.C. § 103(a):

Claims 11-16, 18, 27-32, and 34 stand rejected under 35 U.S.C. § 103(a) over *James* in

view of Fields and in further view of Rhodes. Claims 17, 19-26, 33, 35-37, and 39-42 stand

rejected under 35 U.S.C. § 103(a) over *James* in view of *Fields* and *Rhodes* and in further view

of Smith.

Applicant respectfully submits that *James*, *Fields*, or *Rhodes*, either individually or in combination, fail to disclose, teach, or suggest each and every element of Claims 11-16, 18, 27-32, and 34. Applicant further respectfully submits that *James*, *Fields*, *Rhodes*, or *Smith*, either individually or in combination, fail to disclose, teach, or suggest each and every element of Claims 17, 19-26, 33, 35-37, and 39-42. Thus, Applicant respectfully traverses the Examiners obvious rejection of Claims 11-42 under 35 U.S.C. § 103(a) over the proposed combination of *James*, *Fields*, *Rhodes*, or *Smith*, either individually or in combination.

The proposed *James-Fields-Rhodes-Smith* Combination Fails to Teach, or Suggest Various Limitations Recited in Applicant's Claims

For example, with respect to independent Claim 11, this claim recites:

A computer-implemented system for managing data associated with available-to-promise (ATP) products, comprising:

a memory to store a hierarchy of at least two seller models that each represent a seller for one or more products, each product associated with a product forecast model representing:

forecasted sales of the product through the seller; planned supply of the product;

customer orders for the product through the seller; and

pre-allocated supply of the product to the seller, the pre-allocated supply being a supply of the product that has been pre-allocated to the seller for promising to subsequent customer orders for the product through the seller, the pre-allocation of the supply of the product to the seller occurring prior to distribution of the pre-allocated supply of the product to the seller; and

a processor coupled with the memory, the processor computes the amount of the product that is ATP at a seller according to at least the planned supply of the product, the customer orders for the product through the seller, the preallocated supply of the product to the seller, and the amount of the product that is ATP at one or more other sellers at a higher level in a seller hierarchy. (Emphasis Added).

In addition, *James*, *Fields*, *Rhodes*, or *Smith*, either individually or in combination fail to disclose each and every limitation of dependent Claims 19, 27, and 35.

The Office Action Acknowledges that *James* Fails to Disclose Various Limitations Recited in Applicant's Claims

Applicant respectfully submits that the Office Action acknowledges, and Applicant

agrees, that James fails to disclose various limitations recited in independent Claim 11.

Specifically the Examiner acknowledges that:

James does not explicitly disclose two seller models that each represent a seller for one or more products each product being associated with a product

forecast model; and forecasted sales of the product through the seller.

(20 August 2008 Final Office Action, page 3). (Emphasis Added). However, the Examiner

asserts that the cited portions of Fields disclose the acknowledged shortcomings in James.

Applicant respectfully traverses the Examiner's assertions regarding the subject matter disclosed

in Fields.

Applicant respectfully submits that Fields fails to disclose, teach, or suggest independent

Claim 11 limitations regarding a "hierarchy of at least two seller models that each represent a

seller for one or more products, each product associated with a product forecast model

representing [...] forecasted sales of the product through the seller". In particular, the Examiner

states:

With regard to the 35 U.S.C. 103 rejections, the applicants argue that Fields

does not teach "at least two seller models that each represent a seller for one or more products" wherein each product is associated with a "product forecast model".

However, *Fields clearly discloses two seller models* (Fields: Col. 2, Ln. 1-9).

(20 August 2008 Final Office Action, page 19). (Emphasis added). By contrast, the cited

portion of Fields on which the Examiner relies does not disclose a "hierarchy of at least two

seller models that each represent a seller for one or more products, each product being

associated with a product forecast model representing [....] forecasted sales of the product

through the seller," as recited in independent Claim 11 but is merely the "BACKGROUND OF

THE INVENTION" portion of Fields and the first 4 lines of the "SUMMARY OF THE

INVENTION" portion of Fields. (Column 2, Lines 1-9). (Emphasis added). In fact, Applicant

respectfully directs the Examiner's attention to the cited portion of Fields, on which the

Examiner relies:

[...] unusually large order is placed. What is needed is method of adjusting the projected demand levels in future intervals in proportion to both historical demand trends and current actual demand.

SUMMARY OF THE INVENTION

The present invention provides a system and method for analyzing business demand which incorporates tracking of past business demand for a *plurality of* 

products or tasks, time intervals during the day, and other factors, storing...

(Column 2, Lines 1-9). (Emphasis added). Applicant respectfully submits that the Examiner has

mischaracterized the cited portion of Fields. For example, as noted above, the Examiner states that

"Fields clearly discloses two seller models." (20 August 2008 Final Office Action, page 19).

(Emphasis added). However, Applicant finds no such teachings anywhere in *Fields* and certainly

not in the cited columns and lines of *Fields*, relied on by the Examiner. Applicant respectfully

submits that Fields does not disclose "two seller models," as alleged by the Examiner and

respectfully request the Examiner to point to the portion or portions of Fields that "clearly discloses

two seller models," as alleged by the Examiner. In addition, if "Fields clearly discloses two seller

models," as alleged by the Examiner, then Fields will expressly disclose the term "two seller

models," somewhere in the specification of Fields. However, as discussed above, Fields does not

expressly or even impliedly disclose the term "two seller models" and therefore, Fields clearly does

not disclose "two seller models," as alleged by the Examiner.

Applicants further respectfully submit that even for the sake of argument, if Fields did close the

term "two seller models," somewhere in the specification, which it does not, it clearly does not,

Fields still fails to disclose a "hierarchy of at least two seller models that each represent a seller

for one or more products," as recited in independent Claim 11. Applicant respectfully submits that

the Examiner is silent as to the limitation of a "hierarchy of at least two seller models that each

represent a seller for one or more products". Thus, Applicant respectfully submits that the

equations forming the foundation of the Examiner's comparison between the Fields and

independent Claim 11 cannot be made. Applicant further respectfully submits that these

distinctions alone are sufficient to patentably distinguish independent Claim 11 from Fields.

In addition, the Examiner alleges that:

Fields contemplates that a model can cover a plurality of business items...

(20 August 2008 Final Office Action, page 19). (Emphasis added). By contrast, the cited portion of

Fields on which the Examiner relies does not "contemplate that a model can cover a plurality of

business items," as alleged by the Examiner but rather merely describes a "needed [...] method of

adjusting [...] projected demand levels." (Column 2, Lines 1-9). (Emphasis added). However, this

"needed [...] method of adjusting [...] projected demand levels," as disclosed in Fields does not

include, involve, or even relate to "contemplate[ing] that a model can cover a plurality of business

items," as alleged by the Examiner. Applicant respectfully submits that the Examiner's equation is

inaccurate, that is the "needed [...] method of adjusting [...] projected demand levels" as disclosed

in Fields, does not equate to "contemplate[ing] that a model can cover a plurality of business

items," as alleged by the Examiner because, among other things, the "needed [...] method" of

*Fields* is only a "needed [...] method of adjusting [...] projected demand levels."

Applicant further respectfully requests clarification as to what the Examiner means by

"Fields contemplates that a model can cover a plurality of business items." For example, what

does the Examiner mean by "Fields contemplates" what is contemplated and how does the

Examiner purport that the mere *contemplation* applies to the subject application. In addition, what

does the Examiner mean by a "model can cover a plurality of business items" does the Examiner

mean that the term "can" means it does or does not and what does the Examiner mean by "cover"

and how does the Examiner purport that the mere *contemplation* applies to the subject application.

Thus, Applicant respectfully submits that the equations forming the foundation of the Examiner's

comparison between the *Fields* and independent Claim 11 cannot be made. Applicant further

respectfully submits that these distinctions alone are sufficient to patentably distinguish independent

Claim 11 from Fields.

Furthermore, the Examiner alleges that:

[...] the Office, therefore, takes the position that this means that the *model* disclosed

in Fields can be applied to many different business items wherein each item is

covered by a model.

(20 August 2008 Final Office Action, page 19). (Emphasis added). By contrast, the cited portion of

Fields on which the Examiner relies does not "mean[] that the [alleged] model disclosed in Fields

can be applied to many different business items wherein each item is covered by a model," as

alleged by the Examiner. In fact, as discussed above, the cited portion of Fields, on which the

Examiner relies merely describes a "needed [...] method of adjusting [...] projected demand

levels." (Column 2, Lines 1-9). (Emphasis added). Applicants respectfully request the Examiner to

verify the references to Fields, to ensure that some mistake has not been made.

Still furthermore, the Examiner alleges:

Therefore, since Fields disclose a plurality of items that can be covered by its

model it *inherently discloses a plurality (including two) seller models*. It is *entirely possible* that the two products Fields mentions in the above cited passages come

from two different sellers.

(20 August 2008 Final Office Action, page 19). (Emphasis added). By contrast, the cited portion of

Fields on which the Examiner relies clearly does not make it "entirely possible that the two

products Fields mentions in the above cited passages [Column 2, Lines 1-9] come from two

different sellers," as alleged by the Examiner. In fact, the only reference to "products" that the cited

portion of Fields refers to is the "present invention provides a system and method for analyzing

business demand which incorporates tracking of past business demand for a plurality of products or

tasks, time intervals during the day, and other factors, storing." (Column 2, Lines 1-9). (Emphasis

added). However, "tracking of past business demand for a plurality of products or task," as

disclosed in Fields does not include, involve, or even relate to making it "entirely possible that the

two products Fields [...] come from two different sellers.

In addition, Applicant respectfully submits that the Examiner's "entirely possible" test is not

a valid test under current patent rules or current patent law. Applicant respectfully requests the

Examiner to cite a specific rule in 37 C.F.R. or in the MPEP that describes the Examiner's "entirely

possible" test. The Examiner may call the undersigned, Steven J. Laureanti, at (480) 830-2700 if

the Examiner believes it would be easier to discuss the "entirely possible" test, over the telephone.

In addition, as noted above, the Examiner states that Fields "inherently discloses a plurality

(including two) seller models." (20 August 2008 Final Office Action, page 19). (Emphasis added).

Applicant respectfully disagrees and respectfully traverses the Examiner's assertions regarding

the purported inherent features in Fields. Applicant respectfully submits that the Examiner is

using the subject Application as a template to formulate reconstructive hindsight to reach this

conclusion and reconstructive hindsight is improper under 35 U.S.C. § 103. An anticipating reference, by definition, must disclose every limitation of the rejected claim in the same relationship to one another as set forth in the claim. (*In re Bond*, 15 U.S.P.Q.2d 1566, 1567 (Fed. Cir. 1990)). With respect to the subject Application, the Examiner acknowledges and Applicant agrees that the *Fields does not disclose every limitation of independent Claim 11* in the same relationship to one another as set forth in independent Claim 11.

To the extent the Examiner relies on principles of inherency in making the anticipation rejections in the Office Action, inherency requires that the asserted proposition necessarily flow from the disclosure. (In re Oelrich, 212 U.S.P.Q. 323, 326 (C.C.P.A. 1981); Ex parte Levy, 17 U.S.P.Q.2d 1461, 1463-64 (Bd. Pat. App. & Int. 1990); Ex parte Skinner, 2 U.S.P.Q.2d 1788, 1789 (Bd. Pat. App. & Int. 1987); In re King, 231 U.S.P.Q. 136, 138 (Fed. Cir. 1986)). It is not enough that a reference could have, should have, or would have been used as the claimed invention. "The mere fact that a certain thing may result from a given set of circumstances is not sufficient." (Oelrich, at 326, quoting Hansgirg v. Kemmer, 40 U.S.P.Q. 665, 667 (C.C.P.A. 1939); In re Rijckaert, 28 U.S.P.Q.2d 1955, 1957 (Fed. Cir. 1993), quoting Oelrich, at 326; see also Skinner, at 1789). (Emphasis Added). "Inherency ... may not be established by probabilities or possibilities. The mere fact that a certain thing may result from a given set of circumstances is not sufficient." (Skinner, at 1789, citing Oelrich). (Emphasis Added). Where anticipation is found through inherency, the Office's burden of establishing prima facie anticipation includes the burden of providing "...some evidence or scientific reasoning to establish the reasonableness of the examiner's belief that the functional limitation is an inherent characteristic of the prior art." (Skinner at 1789). (Emphasis Added).

With respect to the subject application, Applicant respectfully submits that the Examiner's assertion is *not supported by scientific reasoning and/or any type of evidence* and appears to be the Examiner's opinions formulated using the subject Application as a template, which constitutes impermissible use of hindsight. In fact, the Examiner's statement that *Fields* "*inherently discloses* a plurality (including two) seller models", is merely a fact that a certain thing may result from a given set of circumstances and is clearly insufficient. (20 August 2008 Final Office Action, page 19). (Emphasis added).

Thus, if the Examiner continues to maintain the rejection of Claims 11-42 based on

inherency, Applicant respectfully requests that the Examiner provide evidence or scientific

reasoning to establish the reasonableness of the examiner's belief that the functional

limitation is an inherent characteristic of the prior art.

The Office Action Also Acknowledges that James Fails to Disclose Other Limitations Recited

in Applicant's Claims

Applicant respectfully submits that the Office Action acknowledges, and Applicant

agrees, that James fails to disclose various limitations recited in independent Claim 11.

Specifically the Examiner acknowledges that:

James does not explicitly disclose pre-allocated supply of the product to

the seller and the system operable to compute the amount of the product that is ATP at the seller according to the planned supply, the customer orders, the pre-

allocated supply and the amount of the product that is ATP at one or more

sellers at a higher level in a seller hierarchy.

(20 August 2008 Final Office Action, page 3). (Emphasis added). However, the Examiner

asserts that the cited portions of Rhodes disclose the acknowledged shortcomings in James.

Applicant respectfully traverses the Examiner's assertions regarding the subject matter disclosed

in Rhodes.

Applicants respectfully submit that *Rhodes* fails to disclose, teach, or suggest independent

Claim 11 limitations regarding a "product forecast model" representing "pre-allocated supply of

the product to the seller, the pre-allocated supply being a supply of the product that has been pre-

allocated to the seller for promising to subsequent customer orders for the product through the

seller, the pre-allocation of the supply of the product to the seller occurring prior to distribution of

the pre-allocated supply of the product to the seller" and "computsing the amount of the product

that is ATP at a seller according to at least the planned supply of the product, the customer orders

for the product through the seller, the pre-allocated supply of the product to the seller, and the

amount of the product that is ATP at one or more other sellers at a higher level in a seller

hierarchy".

In particular, the Examiner states:

However, Rhodes discloses pre-allocated supply of the product to the seller (i.e *plan sales expectations*)(pages 1 and 2)

(20 August 2008 Final Office Action, page 3). (Emphasis added). By contrast, the cited portion of *Rhodes* on which the Examiner relies does not disclose a "*product forecast model*" representing "*pre-allocated supply of the product to the seller*, the pre-allocated supply being a supply of the product that has been pre-allocated to the seller for promising to subsequent customer orders for the product through the seller, the pre-allocation of the supply of the product to the seller occurring prior to distribution of the pre-allocated supply of the product to the seller", as recited in

independent Claim 11. In fact, Applicant respectfully directs the Examiner's attention to the cited

portion of *Rhodes*, on which the Examiner relies:

Sales and operations planning (SOP) software can help establish manufacturing output, *plan sales expectations* and meet business needs such as inventory balancing, employee scheduling, productivity, finance and engineering.

(Page 1). As clearly shown above, *Rhodes* does not teach, suggest, or even hint at "pre-allocated supply of the product," as recited in independent Claim 11 but rather merely discusses that the SOP "software can help establish manufacturing output, plan sales expectations and meet business needs." However, "software [that] can help establish [...] plan sales expectations does not include, involve, or even relate to "pre-allocated supply of the product," as recited in independent Claim 11. In contrast, the "pre-allocated supply of the product to the seller" as recited in independent Claim 11 is a "supply of the product that has been pre-allocated to the seller for promising to subsequent customer orders for the product through the seller, the pre-allocation of the supply of the product to the seller occurring prior to distribution of the pre-allocated supply of the product to the seller." Applicant respectfully requests the Examiner to verify the references to Rhodes, to ensure that some mistake has not been made.

In addition, the Examiner alleges:

The system of Rhodes enables a user to satisfy the current level of sales, therefore, in order to satisfy a level of sales the system of Rhodes must necessarily "compute the amount of product" otherwise how would Rhodes inform a user on how to "satisfy the current planned level of sales." The applicants argue that "the equations forming the foundation of the Examiner's comparison between Rhodes and independent Claim 11 cannot be made." It is not clear to the Office what the

applicants are intending to argue from this quoted language. The Office has not cited to any equations in Rhodes in the rejection of Claim 11 and in fact the Office is citing to passages in Rhodes in the rejection of Claim 11 which teach a means to

"compute the amount of product".

(20 August 2008 Final Office Action, page 19). By contrast, the cited portion of Rhodes on

which the Examiner relies does not disclose "computsing" the amount of the product that is

ATP at a seller according to at least the planned supply of the product, the customer orders for

the product through the seller, the pre-allocated supply of the product to the seller, and the

amount of the product that is ATP at one or more other sellers at a higher level in a seller

hierarchy", as recited in independent Claim 11 but rather merely provides for the SOP process to

better satisfy the current planned level of sales, but does not include, involve, or even relate to

computing the amount of the product, as recited in independent Claim 11. (Page 1). (Emphasis

Added). In contrast, "comput[ing] the amount of the product" recited in independent Claim 11

is provided for computing at a seller according to at least the planned supply of the product,

the customer orders for the product through the seller, the pre-allocated supply of the product to

the seller, and the amount of the product that is ATP at one or more other sellers at a higher level

in a seller hierarchy." Applicant respectfully requests the Examiner to verify the references to

*Rhodes*, to ensure that some mistake has not been made.

The Office Action Fails to Properly Establish a *Prima Facie* case of Obvious over the Proposed James Fields Phodes Swith Combination According to the UPSTO Examination

Proposed James-Fields-Rhodes-Smith Combination According to the UPSTO Examination

**Guidelines** 

Applicant respectfully submits that the Office Action fails to properly establish a *prima facie* 

case of obviousness based on the proposed combination of James, Fields, Rhodes, or Smith, either

individually or in combination, and in particular, the Office Action fails to establish a prima facie

case of obviousness based on the "Examination Guidelines for Determining Obviousness Under 35

U.S.C. 103 in View of the Supreme Court Decision in KSR International Co. v. Teleflex Inc." (the

"Guidelines").

As reiterated by the Supreme Court in KSR International Co. v. Teleflex Inc. (KSR), the

framework for the objective analysis for determining obviousness under 35 U.S.C. 103 is stated in

Graham v. John Deere Co. (383 U.S. 1, 148 USPQ 459 (1966)). Obviousness is a question of law

based on underlying factual inquiries. These factual inquiries enunciated by the Court are as follows:

- (1) Determining the scope and content of the prior art;
- (2) Ascertaining the differences between the claimed invention and the prior art; and
- (3) Resolving the level of ordinary skill in the pertinent art.

(Notice, 72 Fed. Reg. 57527 (Oct. 10, 2007)). Objective evidence relevant to the issue of obviousness must be evaluated by Office personnel. (383 U.S. 17–18, 148 USPQ 467 (1966)). As stated by the Supreme Court in *KSR*, "While the sequence of these questions might be reordered in any particular case, the [*Graham*] factors continue to define the inquiry that controls." (*KSR*, 550 U.S. at ,82 USPQ2d at 1391).

However, it is important to note that the Guidelines require that Office personnel "ensure that the written record includes findings of fact concerning the state of the art and the teachings of the references applied. (Notice, 72 Fed. Reg. 57527 (Oct. 10, 2007)). In addition, the Guidelines remind Office personnel that the "factual findings made by Office personnel are the necessary underpinnings to establish obviousness." (id.). Further, "Office personnel must provide an explanation to support an obviousness rejection under 35 U.S.C. 103. (id.). In fact, "35 U.S.C. 132 requires that the applicant be notified of the reasons for the rejection of the claim so that he or she can decide how best to proceed" and "clearly setting forth findings of fact and the rationale(s) to support a rejection in an Office action leads to the prompt resolution of issues pertinent to patentability." (id.).

With respect to the subject application, the Office Action has not shown the *factual findings* necessary to establish obviousness or even an explanation to support the obviousness rejection based on the proposed combination of James, Fields, Rhodes, and Smith. The Office Action merely states that "it would have been obvious to one of ordinary skill in the art at the time of Applicant's invention to include the teachings of Fields within the James system [and] to include the features as disclosed by Rhodes within the James and Fields combination". (20 August 2008 Final Office Action, pages 3-4). Applicant respectfully disagrees and respectfully submits that the Examiner's conclusory statement is not sufficient to establish the factual findings necessary to establish obviousness and is not a sufficient explanation to support the obviousness rejection based on the

proposed combination of James, Fields, Rhodes, and Smith. Applicant respectfully requests that the Examiner provide proper support for the obviousness rejection under 35 U.S.C. 103 as necessitated by the Guidelines, including the factual findings necessary to establish obviousness to "ensure that the written record includes findings of fact concerning the state of the art and the teachings of the references applied. (Notice, 72 Fed. Reg. 57527 (Oct. 10, 2007)).

The Guidelines further provide guidance to Office personnel in "determining the scope and content of the prior art" such as, for example, "Office personnel must first obtain a thorough understanding of the invention disclosed and claimed in the application." (Notice, 72 Fed. Reg. 57527 (Oct. 10, 2007)). The scope of the claimed invention must be clearly determined by giving the claims the "broadest reasonable interpretation consistent with the specification." (See Phillips v. AWH Corp., 415 F.3d 1303, 1316, 75 USPQ2d 1321, 1329 (Fed. Cir. 2005) and MPEP § 2111.). In addition, the Guidelines state that any "obviousness rejection should include, either explicitly or implicitly in view of the prior art applied, an indication of the level of ordinary skill." (Notice, 72 Fed. Reg. 57528 (Oct. 10, 2007)). With respect to the subject Application, the Office Action has not provided an indication of the level of ordinary skill. Applicant respectfully requests that the Examiner provide proper support for the obviousness rejection under 35 U.S.C. 103 as necessitated by the Guidelines, including an indication of the level of ordinary skill, relied upon by the Examiner. (Notice, 72 Fed. Reg. 57527 (Oct. 10, 2007)).

The Guidelines still further provide that once the *Graham* factual inquiries are resolved, Office personnel must determine whether the claimed invention would have been obvious to one of ordinary skill in the art. (*Id.*). For example, the Guidelines state that *Office personnel must explain* why the difference(s) between the prior art and the claimed invention would have been obvious to one of ordinary skill in the art. (*Id.*). In addition, the Guidelines state that the proper analysis is whether the claimed invention would have been obvious to one of ordinary skill in the art after consideration of all the facts. (*Id.* and See 35 U.S.C. 103(a)).

With respect to the subject Application, the Office Action has not expressly resolved any of the *Graham* factual inquiries to determine whether Applicant's invention would have been obvious to one of ordinary skill in the art. In addition, the Office Action fails to *explain why the difference(s) between the proposed combination of James, Fields, Rhodes, Smith and Applicant's* 

claimed invention would have been obvious to one of ordinary skill in the art. The Office Action merely states that "in order to provide products in timely response to customer demands" and for "allowing access to relevant data, facilitating fast decision making and providing material and resource management information to sales and marketing teams." (20 August 2008 Final Office Action, pages 3-4). Applicant respectfully disagrees and further respectfully requests clarification as to how this statement explains why the difference(s) between the proposed combination of James, Fields, Rhodes, Smith and Applicant's claimed invention would have been obvious to one of ordinary skill in the art. Applicant further respectfully submits that the Examiner is using the subject Application as a template to formulate reconstructive hindsight, which constitutes impermissible use of hindsight under 35 U.S.C. § 103(a).

The Guidelines yet further state that the "key to supporting any rejection under 35 U.S.C. 103 is the *clear articulation of the reason(s) why the claimed invention would have been obvious*." (Notice, 72 Fed. Reg. 57528 (Oct. 10, 2007)). In fact, the Supreme Court in *KSR* noted that "the analysis supporting a rejection under 35 U.S.C. 103 should be made explicit." (id.). The Court quoting *In re Kahn* (441 F.3d 977, 988, 78 USPQ2d 1329, 1336 (Fed. Cir. 2006)), stated that ""[R]ejections on obviousness cannot be sustained by mere conclusory statements; instead, there must be some articulated reasoning with some rational underpinning to support the legal conclusion of obviousness." (KSR, 550 U.S. at \_\_, 82 USPQ2d at 1396). The Guidelines provide the following seven rationales:

- (A) Combining prior art elements according to known methods to yield predictable results;
- (B) Simple substitution of one known element for another to obtain predictable results;
- (C) Use of known technique to improve similar devices (methods, or products) in the same way;
- (D) Applying a known technique to a known device (method, or product) ready for improvement to yield predictable results;
- (E) "Obvious to try"—choosing from a finite number of identified, predictable solutions, with a reasonable expectation of success;
- (F) Known work in one field of endeavor may prompt variations of it for use in either the same field or a different one based on design incentives or other market forces if the variations would have been predictable to one of ordinary skill in the art;

(G) Some teaching, suggestion, or motivation in the prior art that would have led one of ordinary skill to modify the prior art reference or to combine prior art

reference teachings to arrive at the claimed invention.

Applicant respectfully submits that the Office Action fails to provide any articulation, let

alone, clear articulation of the reasons why Applicant's claimed invention would have been

obvious. For example, the Examiner has not adequately supported the selection and combination

of James, Fields, Rhodes, and Smith to render obvious Applicant's claimed invention. The

Examiner's unsupported conclusory statements that "it would have been obvious to one of ordinary

skill in the art at the time of Applicant's invention to include the teachings of Fields within the

James system [and] to include the features as disclosed by Rhodes within the James and Fields

combination" and "in order to provide products in timely response to customer demands" and for

"allowing access to relevant data, facilitating fast decision making and providing material and

resource management information to sales and marketing teams", does not adequately provide clear

articulation of the reasons why Applicant's claimed invention would have been obvious. (20

August 2008 Final Office Action, pages 3-4). In addition, the Examiner's unsupported conclusory

statement fails to meet any of the Guidelines rationales to render obvious Applicant claimed

invention.

Thus, if the Examiner continues to maintain the obvious rejection based on the proposed

combination of James, Fields, Rhodes, and Smith, Applicant respectfully requests that the

Examiner provide proper support for the obviousness rejection under 35 U.S.C. 103 as

necessitated by the Guidelines, including a statement by the Examiner identifying which one of

the seven rationales the Examiner is relying on and the proper analysis of that particular

rationale, as required by the Guidelines.

Applicant's Claims are Patentable over the Proposed James-Fields-Rhodes-Smith

Combination

Applicant respectfully submits that independent Claim 11 is considered patentably

distinguishable over the proposed combination of James, Fields, Rhodes, or Smith. This being the

case, independent Claims 19, 27, and 35 are also considered patentably distinguishable over the

proposed combination of James, Fields, Rhodes, or Smith, for at least the reasons discussed above in

connection with independent Claim 11.

Furthermore, with respect to dependent Claims 12-18, 20-26, 28-34, and 36-42; Claims 12-

18 depend from independent Claim 11; Claims 20-26 depend from independent Claim 19; Claims

28-34 depend from independent Claim 29; and Claims 36-42 depend from independent Claim 35.

As mentioned above, each of independent Claims 11, 19, 27, and 35 are considered patentably

distinguishable over James, Fields, Rhodes, or Smith. Thus, dependent Claims 12-18, 20-26, 28-34,

and 36-42 are considered to be in condition for allowance for at least the reason of depending from

an allowable claim.

For at least the reasons set forth herein, Applicant respectfully submits that Claims 11-42 are

not rendered obvious by the proposed combination of James, Fields, Rhodes, or Smith. Applicant

further respectfully submits that Claims 11-42 are in condition for allowance. Thus, Applicant

respectfully requests that the rejection of Claims 11-42 under 35 U.S.C. § 103(a) be reconsidered

and that Claims 11-42 be allowed.

**CONCLUSION:** 

In view of the foregoing amendments and remarks, this application is considered to be in

condition for allowance, and early reconsideration and a Notice of Allowance are earnestly

solicited.

Although Applicant believes no additional fees are deemed to be necessary; the undersigned

hereby authorizes the Director to charge any additional fees which may be required, or credit any

overpayments, to **Deposit Account No. 500777**. If an extension of time is necessary for allowing

this Response to be timely filed, this document is to be construed as also constituting a Petition for

Extension of Time Under 37 C.F.R. § 1.136(a) to the extent necessary. Any fee required for such

Petition for Extension of Time should be charged to **Deposit Account No. 500777**.
